

**Model # DSP-8-5-15**

- A simple-to-use intelligent controller that monitors and distributes available power as necessary to multiple power strips inside a notebook or netbook cart, preventing the risk of overloading circuits in large carts
- Provides four outlets marked “always on” for peripherals that need constant power
- Can be installed inside or outside any cart
- Equipped with overload and surge protection
- Provided with mounting hardware and two removable brackets
- Lighted circuit protection on/off switch
- Dimensions: 13.02”W x 6”D x 1.98”H
- Constructed of durable 20 gauge steel
- 15 foot heavy duty power cord
- Input voltage: 120 volts AC – 60 Hz
- Load output voltage: 120 volts AC – 60 Hz
- Load output wattage: 1725 watts
- Maximum output current: 15 amps
- Listed UL standard ITE 60950
